

# Intelligent Four-way Shuttle

Density Storage Solution

# Intelligent four-way shuttle customizable solution

The intelligent four-way shuttle is a warehousing robotic equipment developed for the intensive storage of stereoscopic warehouse. It can operate in four directions automatically and has cluster scheduling and automatic charging functions. It is able to cooperate with other equipment such as elevators and conveyor lines. It can combine with RCS, WCS, WMS and other software systems to be used in a fully automatic stereoscopic warehouse, which is applicable in dense storage scenarios in industries such as food, medicine, automobiles, and new energy.

## Advantages of the product

### Precise and Efficient

Driving and Positioning Accuracy within  $\pm 2\text{mm}$   
Operational Speed reaches 2m/s

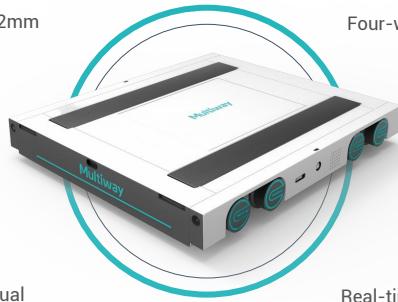

### Stable Operation, Flexible Movement

Four-way operation, Cargo in-situ horizontal reversal  
Suitable for a variety of complex scenes

### High Density Storage

Multi-depth Dense Storage  
3-4 Times More Storage Capacity than Usual

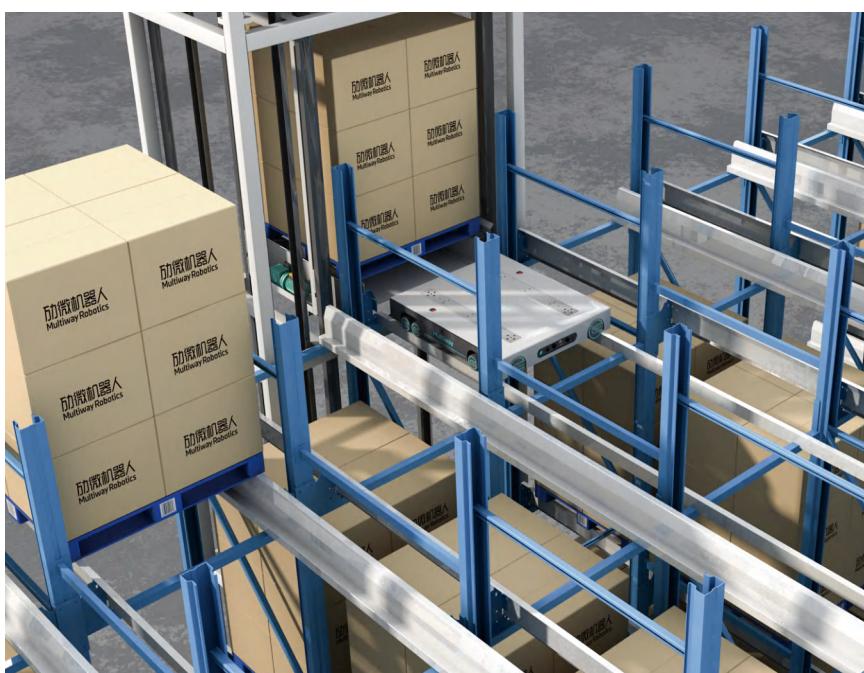

### Smart Dispatching

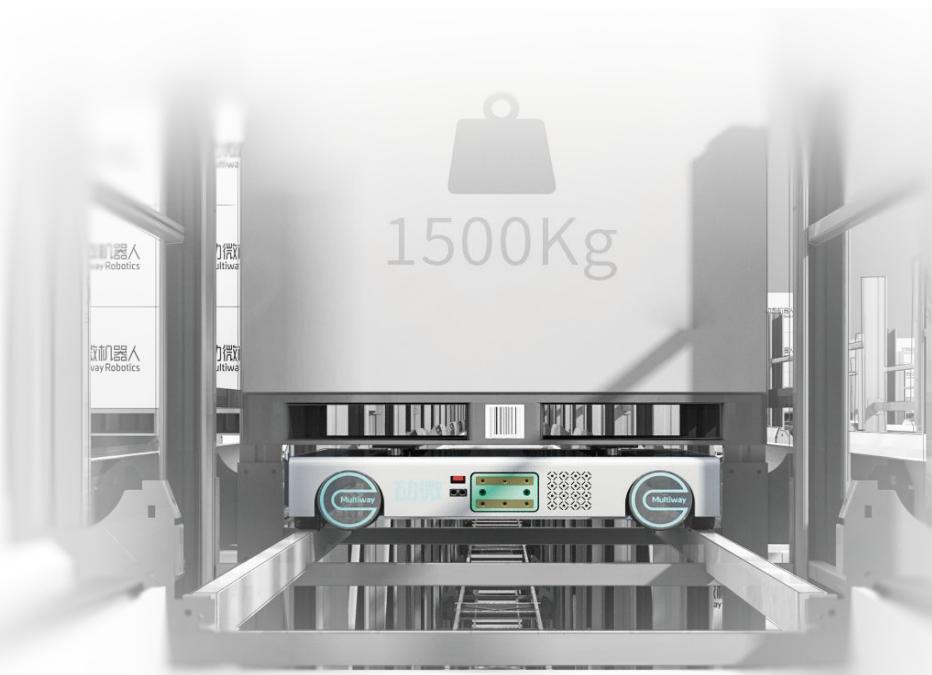

Cloud Dispatching, Path Optimization  
Real-time and efficient scheduling of multiple vehicles

### Visual Protection

Through real-time perception of the environment, detecting cargo over-loading, avoiding the risk of cargo overturning  
Detecting the falling of load, real-time video stream transmission terminal, manual judgment and processing in time, ensuring operation efficiency and safety

## Product Specifications

|                         |                              |  |
|-------------------------|------------------------------|--|
| Basic Parameter         | Model                        | Z15                                    |
|                         | Dimensions                   | 1300x980x136mm                         |
|                         | Rated Load                   | 1500kg                                 |
|                         | Pallet Width                 | 1200-1300mm                            |
|                         | Pallet Height                | 1000-1300mm                            |
|                         | Jacking Height               | 42mm                                   |
|                         | Weight                       | 400kg                                  |
|                         | Temp. Environment            | -5°C ~45°C                             |
|                         | Control Mode                 | Manual/Auto                            |
| Movement Specifications | Driving Features             | Four-way                               |
|                         | Jacking Method               | Hydraulic Lifting (Mechanical Lifting) |
|                         | Drive Method                 | Hydraulic Drive (Servo Drive)          |
|                         | Max Driving Speed            | 1.5m/s                                 |
|                         | Positioning Accuracy         | ±2mm                                   |
|                         | Jacking Time                 | 4s                                     |
|                         | Motion Noise Level (>1m)     | ≤75dB                                  |
|                         | Battery Type (Standard)      | Lithium Iron Phosphate                 |
|                         | Standard Capacity            | 48V/40Ah                               |
| Battery Specifications  | Run time                     | 6~8h                                   |
|                         | Charging Mode                | Auto/Manual                            |
|                         | Positioning Fault Protection | ●                                      |
|                         | Component Fault Protection   | ●                                      |
| Safety Protection       | Anti-Collision Detection     | ●                                      |

● Standard The dimensions can be customized to satisfy project requirement

## System functions

Change Direction in Place

Multi-shuttle Scheduling

Intelligent Dynamic Management

Route Planning

Drop Detection

Overload Detection

Temperature Detection

Modular Configuration

Safety System

Standard Port Interface

Free Combination of Storage Space

Automatic Charging

# Multiway Robotics

---

Multiway Robotics, a leading intelligent intralogistics solution provider, is dedicated to improve intralogistics efficiency, ensure work safety and reduce labor operational cost.

**Global Presence:** The headquarters is located in Shenzhen, China, with production facilities in Zhejiang. Multiway has also established subsidiaries in the United States, Germany, Japan, South Korea, and more, extending business, operations, and services to 30+ countries and regions worldwide.

**Our Expertise:** Focusing on advanced robotics and AI technology, Multiway Robotics is committed to delivering cutting-edge Smart Intralogistics Solution to our customers. Multiway offers a comprehensive, integrated innovation delivery platform and solutions, ranging from core sensors and algorithms to self-developed unmanned forklifts and upper-level control systems. Hardware products include a full range of unmanned forklifts and four-way shuttle, while software systems encompass Multiway Cloud, WMS, RCS, WCS, on-site management systems, and various visual solutions.

**Software:** WMS, RCS, WCS, Multiway Cloud, Horizons, Simulation

**Hardware:** AGV forklifts, AGV Tugger, AMR & Four-way Shuttle

After successfully delivering numerous benchmark projects in industries such as factories, warehousing, and logistics, Multiway has become a trusted and ongoing collaborative partner for many industry-leading customers.
