Multiway Horizons

We leverage machine vision and AI technologies to develop adaptable solutions that drive smart manufacturing and intelligent logistics. Through vehicle-road collaboration, vehicle-factory collaboration, and comprehensive monitoring of business dynamics, we enable visualized management and ensure a secure operational environment facilitated by an edge computing data processing platform. This guarantees the stable operation of the factory, cost reduction, and improved efficiency.

Three Key Functions

Function Module

Flexible Empowerment

Cage Stacking

- Cage deformation detection
- Stacking safety inspection
- Cargo offset detection
- Disassembly and stacking at different heights
- Single-side clearance of up to 10mm is supported

Automated Loading and Unloading for Vehicles

- Compatible with multiple vehicle types (wing body, flatbed, van)
- Location planning for different cargos (optimized space utilization)
- The maximum tilt angle of the tailgate dock leveler is 8°

High-Bay Storage

- High-precision cargo picking and placing
- Cargo unloading space detection

Pallet Posture Recognition

- Support pallet deviation of up to $\pm 45^\circ$ and ± 80 cm
- Compatible with various types of pallets, cages, etc.
- Non-stop pallet pose identification by visual perception
- Non-standard carriers support online modeling by users for rapid deployment
- Support side placed, front picking;

Operation and Management

Visual Inventory

- Inspection of images for full-pallet cargo
- Calculation of full-pallet cargo quantity

Storage Location Detection

- Available location detection
- Offset detection
- Detects presence or absence of any cargo at any slot: no training required

Cargo Information Recognition

- Barcode recognition
- Chinese character recognition
- Overload detection
- Diameter measurement
- Color recognition
- Quantity calculation
- Contour detection
- dth × Height measurement

Safety Monitoring

Vehicle-Road Collaboration

- Intruder detection
- Foreign object detection on tracks
- Path interference detection

Environmental Safety Detection

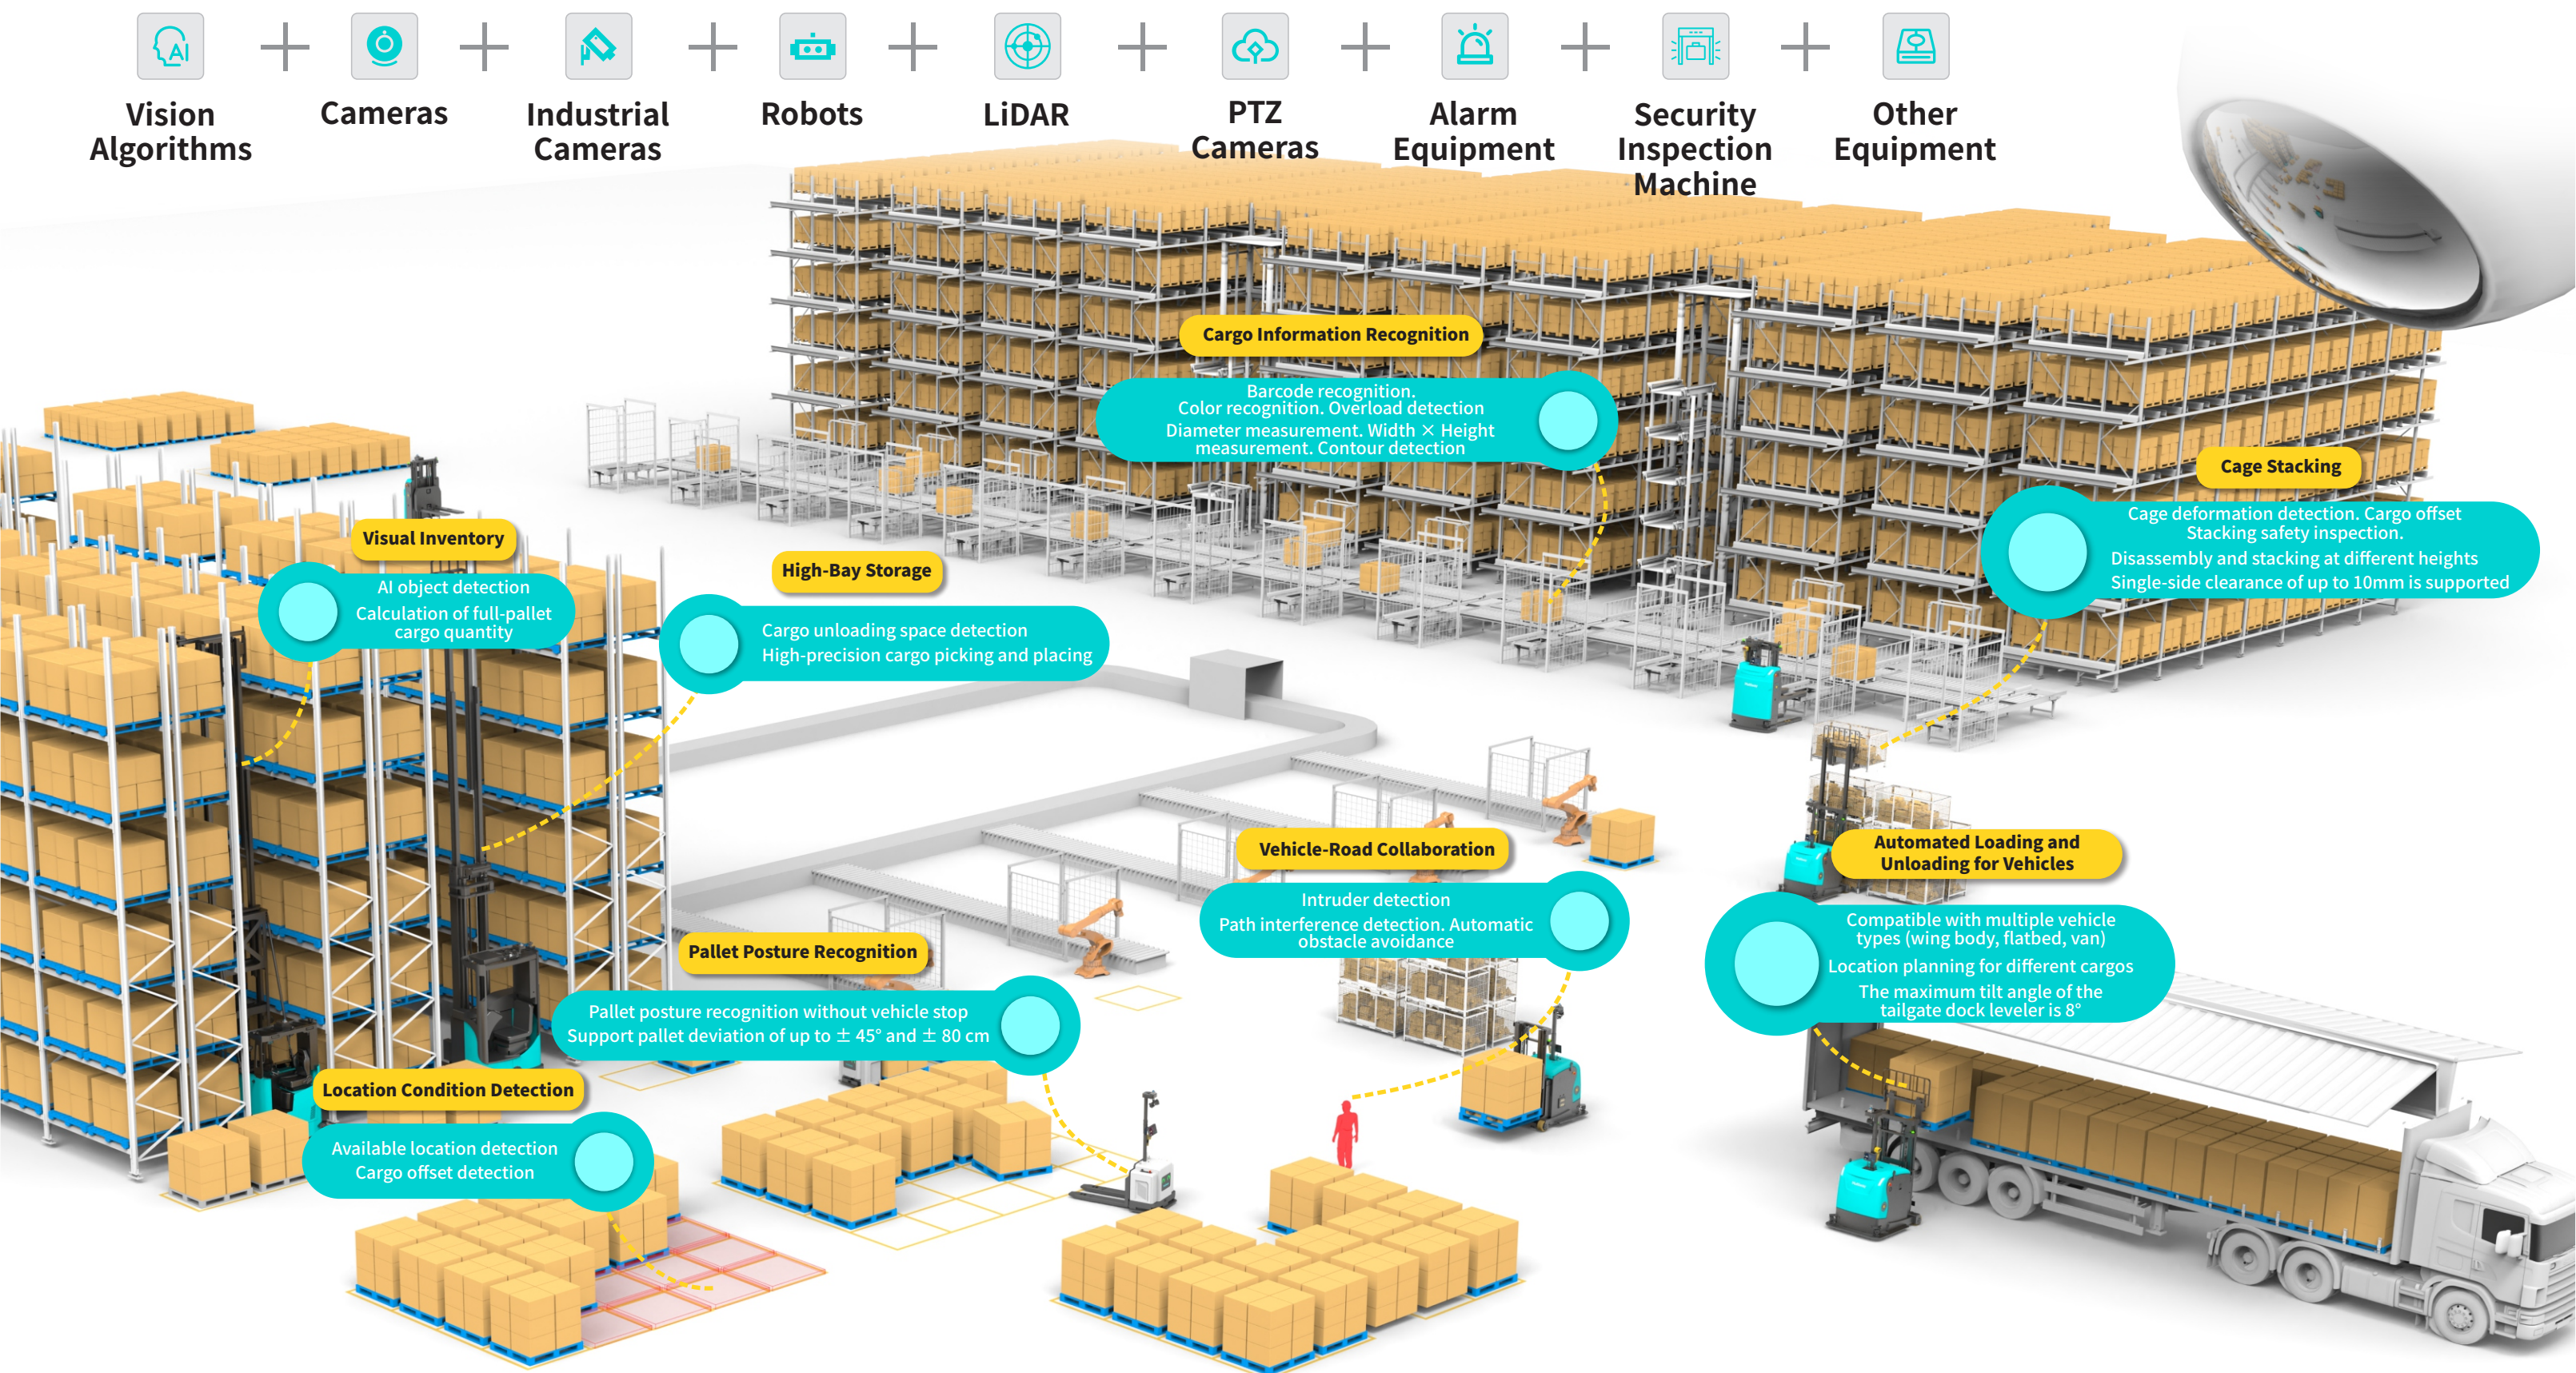

- Open flame and smoke detection
- Calculation of full-pallet cargo quantity

Worksite Safety Inspection

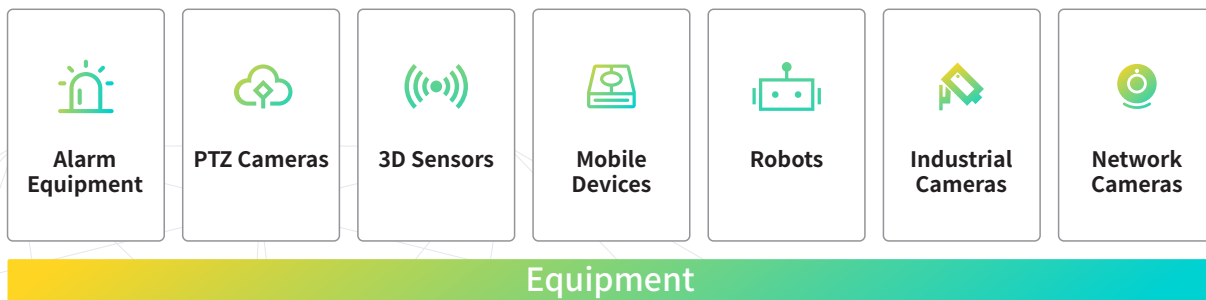

- Face recognition
- Off-duty detection
- Fall detection
- Uniform detection
- Helmet detection
- Glove detection
- Abnormal behavior detection
- Cargo overturning detection

Multiway Robotics

Multiway Robotics, a leading intelligent intralogistics solution provider, is dedicated to improve intralogistics efficiency, ensure work safety and reduce labor operational cost.

Global Presence: The headquarters is located in Shenzhen, China, with production facilities in Zhejiang Wuzhen. Multiway has also established subsidiaries in the United States, Germany, Japan, South Korea, and more, extending business, operations, and services to 40+ countries and regions worldwide.

Our Expertise: Focusing on advanced robotics and AI technology, Multiway Robotics is committed to delivering cutting-edge Smart Intralogistics Solution to our customers. Multiway offers a comprehensive, integrated innovation delivery platform and solutions, ranging from core sensors and algorithms to self-developed unmanned forklifts and upper-level control systems. Hardware products include a full range of unmanned forklifts and four-way shuttle, while software systems encompass WMS, RCS, WCS, on-site management systems, and various visual solutions.

Software WMS, RCS, WCS, Multiway Horizons, Simulation

Hardware: AGV forklifts, AGV Tugger, AMR & Four-way Shuttle

After successfully delivering numerous benchmark projects in industries such as factories, warehousing, and logistics, Multiway has become a trusted and ongoing collaborative partner for many industry-leading customers.
